Xnet
your reliable IT partner

> During the upgrade from SharePoint 2010 to SharePoint 2016, Kompas Xnet proved themselves a technically extremely competent partner. The upgrade and migration of all content and solutions on the AJPES intranet portal was executed without any problems and in the agreed upon time-frame. Users could continue to use all existing services immediately after the migration and they were also satisfied with the new webpage design. Because of the above stated facts, we would definitely recommend Kompas Xnet to others.

Marjan Babič - Chief Technology Officer, Deputy Director **AJPES**

> We were thinking about upgrading from SharePoint 2007 for a couple of years. We knew it was a huge undertaking in regards to the required technical expertise and amount of content on our serverst, we chose Kompas Xnet as they have the necessary knowledge and experience with the implementation of such systems. Our decision to pick Kompas Xnet turned out to be correct, because they helped us with their knowledge, responsibility and professional approach during the entire project. With their help, we upgraded and updated the intranet at the Slovenian National Employment Agency to the newest version of SharePoint – 2016. We thank Kompas Xnet for their constructive approach and good cooperation.

Anton Furlan - Area Director Slovenian **Zavod za zaposlovanje**

IT SERVICES   TRAINING   TESTING CENTER

Microsoft Partner

IT SERVICES

We offer a wide array of services and custom solutions for Microsoft products. Our team of highly skilled experts, who are well versed in the use of the newest in technology, are a guarantee for the success of a project.

Infrastructure Services

Support your business with the appropriate technology.

We offer assistance with implementations, renovations and management of IT infrastructure. We can help with demanding infrastructure projects, major event organization and provide end user assistance (HelpDesk). Our specialty are migrations to the Microsoft cloud (Office 365 and Azure).

Custom Software Development

Solve complex and specific problems with customized software solutions.

Our development portfolio includes custom-made applications, websites and web stores, hosting and maintenance of software. Using a holistic approach, we take care of the appropriate software architecture, a unique and visually appealing graphical design and a high-quality technical execution and implementation into your IT environment.

SharePoint Solutions

Promote collaboration and efficiency by using SharePoint - Microsoft's multipurpose platform.

We can set up the necessary infrastructure, implement a portal for teamwork and collaboration, a system for working with documents and provide support and maintenance. If necessary, we can develop customized solutions or additional functionalities and take care of implementing them to SharePoint Online or on-prem.

TRAINING

We are the leading Microsoft training center in Slovenia and Slovenia's representative in the Leading Learning Partners Association – LLPA. Our trainings are held in modernly equipped classrooms at our company or at the client's location.

✓ End User Training

Our training portfolio includes computer training in the field of Microsoft Office applications and advanced classes for more demanding users.

✓ IT Pro Training

We specialize in training for Microsoft technologies and we offer a wide array of classroom courses, online courses on-demand courses and a combination of modern learning methods and tools under the Learning as a Service program.

✓ Individual and Custom Training

We conduct various custom workshops for companies and individual training that can take place at our company or the client's location.

✓ Business Skills

We also organize training in the field of business informatics that delve into the topics of service management methodology and IT project management.

TESTING CENTER

Kompas Xnet is a Certiport and Pearson VUE certified testing center, where you can take exams to test your knowledge and get certified in the field of basic computer skills and advanced IT topics.
